

SWING

THE ALUMINUM CONSTRUCTION SET is a carefully designed and engineered toy. It is made of the finest aluminum alloy used in building our giant airplanes. It is as strong as steel yet will not rust. The toys shown in this pamphlet are just a few which can be constructed with this set. If you use your imagination you can think of many new ones to build and have fun with. If you find that you want to construct more complicated designs than is possible with the number of parts contained in this set you can send for additional parts as desired.

PARTS

Part Number	Description	Number of Pieces	Price
1	8 inch piece	1	\$.10
