american LOGS

Build realistic-looking toy replicas
of the dwellings of Pioneer Days!

Safe precision-made splinter-free wood

SET NO. 835

approximately 300 PIECES

Relive America's exciting history of early pioneer days with American Logs. Children gain a new appreciation of the importance of the log cabin and the log fort in the conquest of the west. The drama of frontier life becomes a vivid experience as models of log cabins, trading posts, forts and corrals are recreated. American Logs have the realism of the original square axe-hewn logs of frontier days. They are precision made of selected splinter free wood $\frac{3}{4}$ " size, colored and waxed. Ends are notched for positive interlocking so completed buildings are solid enough to pick up and move, yet can be taken apart easily for building a different model. Easy-to-follow instruction book included. Provides endless hours of absorbing play.

This package is sold by count and not by volume. When packed, it was full as practical without damage to contents. Occasionally a package may not contain all the pieces.
