COLOURS MINI

ARKIT is a multi-award winning architectural modelling system. The reusable freeform components allow budding architects and model enthusiasts to physically explore designs and bring ideas to life faster than ever before.

Build your own designer home with Mini Modern Colours 2.0! Explore multiple design possibilities using the unique contemporary components inspired by modern architecture. This set is perfect for aspiring architects to envisage 'cutting edge' buildings and bring their designs to life!

It's fast, modular and provides hours of fun!

Arkit is based on modern building techniques and the components are designed to a standard 1.2m/4ft modular grid to scale. Mini Modern Colours 2.0 is compatible with all other Arkit products of the same scale.

Pro tip! For even more fun, why not integrate Arkit Mini Modern Colours 2.0 with other Arkit products including our mini series kits and Arkit 90 .

Le grá.

i 14 - Make sure to align walls before loosely applying floor panel on top. Take your time to insert the wall pegs into the correct floor panel holes. 15.1 - Once pegs and holes are aligned, take the model in your hands and squeeze around the perimeter to fully secure the floors and the walls. 15.2 - To avoid bending window components when connecting to floors, simply use the openings to squeeze and secure top of window and floors panel together. 15.3 - Then mount the model block on top of the low walls as indicated. 16 - Add links to top of stairs and connect to model as indicated.
