

BILL-DEEZY

U.S.A.

TYPE	'Do it yourself' Constructional engineering.	
HOLE DIAMETER	As required	HOLE SPACING As required
SETS IN SYSTEM	Several: Priced from 50c to \$5.00	
DIFFERENT PARTS	About 6	
COLOUR		
FIXING METHOD	Thought to be rod and bracket or sleeve of bendy material.	
MOTORS	None	
PERIOD	From 1913 to ?	
MANUFACTURER	Bill-Deezy, 151 Milk Street, Boston, Mass., USA	
COMMENTS	The rods, light and easily handled can be cut to any length, to fit the Flexible joints which bend to any angle Not a great deal of information available on the system.	
OTHER SYSTEMS	52/1587, 54/1647	
NEWSLETTER		
MATERIAL SUPPLIED BY:	Bruce Baxter	

TRAINING YOUR BOYS IMAGINATION.

Although America's brains are bent on things mechanical, our men do not become mere mechanical automatics, as evidenced by the splendid imagination behind our great engineering feats and business enterprises. What your boy needs now, in preparation for his future, is something that gives vigor to a creative imagination.

Of all construction toys there is one that will do more for him than any other. It has no set lengths of girders to limit his ingenuity. The rods, light and easily handled, can be bent or cut any length. Flexible joints connect them at any angle.

This is

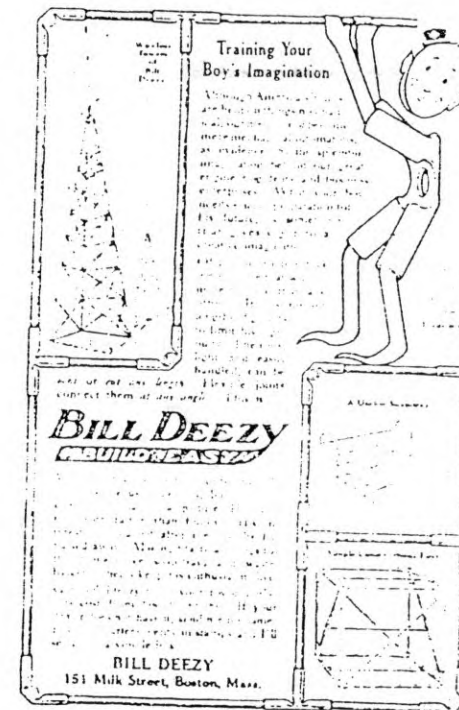

BILL DEEZY
Build easy.

With this it is possible for your boy to build not only the usual designs but anything else his imagination can picture. He learns to create rather than follow. His interest is sustained after the novelty has passed away. Making practical things for the home - like soap-trays and waste-baskets - helps keep his enthusiasm alive.

Get BILL DEEZY from your toy dealer's. Sets cost from 50c to \$5.00. If your dealer does not have it, send me his name. Enclose fourteen cents in stamps and I'll send you a sample box.

BILL DEEZY
151 Milk Street, Boston, Mass.
