A toy which entertains, provokes creative thinking and teaches at the same time - never boring!

BILOfix enables younger children to construct their first models and offers the older children unlimited and technically interesting construction possibilities.

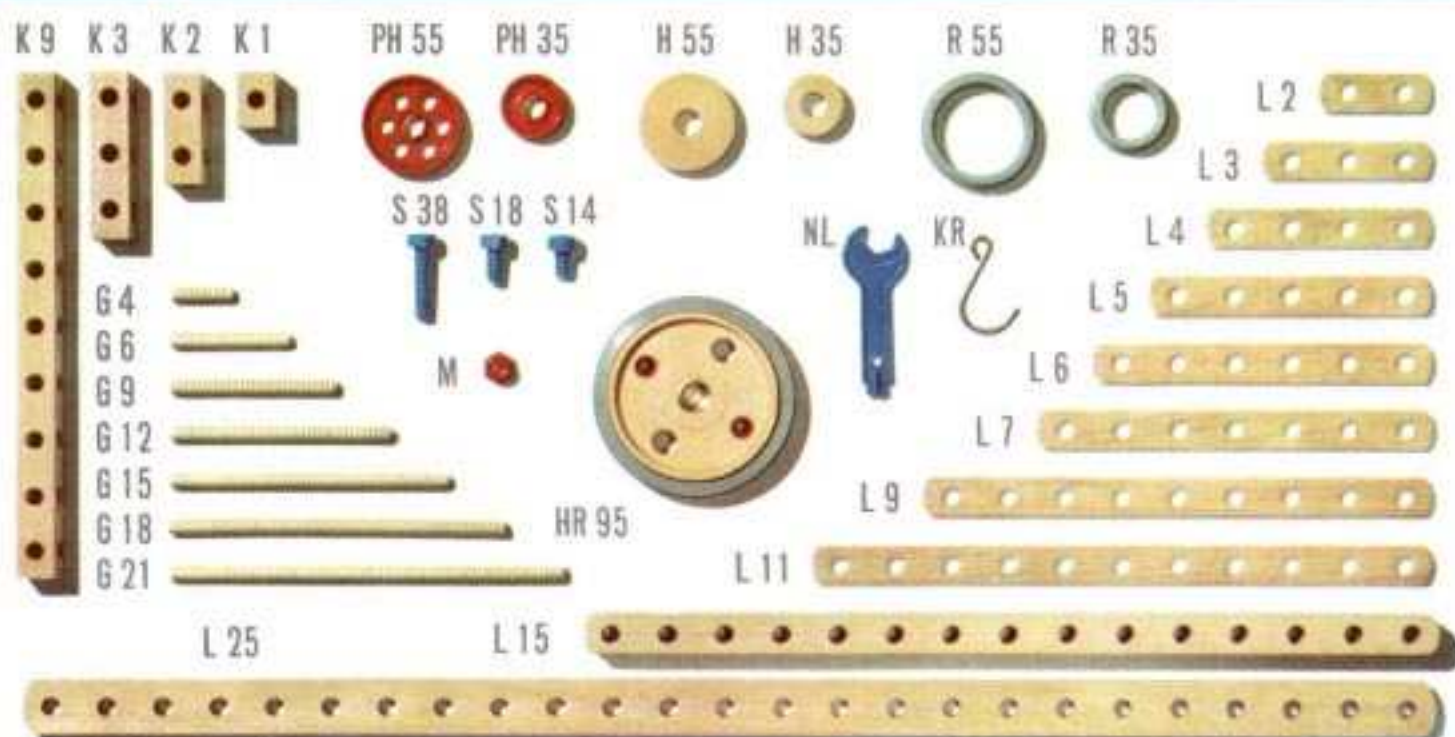

BILOfix®

BILOfix lasts a «childtime» starting with the most simple model then to animated technical models to the most difficult, useable scooter or large crane etc. Some samples - just a few to be sure - from thousands of possibilities are shown in this leaflet.

BILOfix can readily be expanded without limits - all parts are available in supplementary boxes. The system is recommended by educators and pre-school establishments. It received in 1965 the «TOY OF THE YEAR» award from France and Denmark.

				Per Box
22	Construction Set			16/6
24	Construction Set			27/6
26	Construction Set			37/6
28	Construction Set			59/6
