As The Boy Builds The Toy The Toy Builds The Boy

[illegible][illegible]

It's amazing the way this material can be used in so many ways. It's the kind of thing you can use in your car, your home, your office, your school, your business, your hobby, your garden, your kitchen, your bathroom, your bedroom, your living room, your dining room, your family room, your den, your study, your library, your workshop, your garage, your basement, your attic, your crawlspace, your roof, your walls, your floors, your ceilings, your doors, your windows, your furniture, your appliances, your tools, your equipment, your supplies, your materials, your products, your services, your business, your life.

The following pages tell you exactly how to build and give your classroom structure the upper, middle and lower levels. Your own imagination will make these four hands even stronger.
