

Moteurs : A partir de 1950, un moteur mécanique Meca-Bob et un moteur électrique 4-10 volts Vikyvit

•

A diagram showing a cross-joint of two rods. A horizontal rod and a vertical rod intersect at a central point. A small, dark, rectangular component is attached to the vertical rod at the intersection point. Labels with leader lines point to various parts: 'vis' points to the top of the vertical rod; 'tringle' points to the top of the horizontal rod; 'joint' points to the central intersection area; and another 'tringle' points to the bottom of the vertical rod.

1° — les assemblages, si complexes et importants soient-ils, ne nécessitent qu'un seul outil: le tournevis, à l'exclusion de toute clef, pince, etc.

4° Enfin une série de **10 boîtes complémentaires spéciales**, permettant de réaliser **l'auto-sport, l'avion, la jeep ou le tramway** en partant des boîtes Luxe ou Standard **24, 48 ou 96**.
