

BOLT 'N' BUILD CONSTRUCTION SETS

HOW TO BREAK APART THE TUBES

The long tubes in this set are scored to break into various sizes. To break apart, hold tube with both hands and using thumbs push away from you. When breaking a short section, hold tube between fingers.

USING THE PARTS BOX

Place the connectors in the parts box with the pointed end up – as shown. Place the connect-a-tool in the “open” position over the head of the fastener, squeeze trigger to grip position and remove the fastener from the box.

To disengage fastener from connect-a-tool,TM put slotted end of fastener back into hole in the parts box. Push down on tool. The trigger will automatically pop up into the open position and the fastener will disconnect from the tool.

Using this quick and fast assembly method will allow you free use of your other hand.
