**CANADIAN
LOGS**

72 Pieces

CONTENTS: Logs, roof slats, clips, gables.

Bring back the romance and adventure of the Wild West with wooden Canadian Logs. As children construct pioneer cabins, forts, towns and ranches, they enjoy hours of unstructured creative play.

It's easy to build with interlocking logs. Make a sturdy base with split logs, adding round logs to the desired height. Use the shorter pieces to make openings for windows and doors. Build a pitched roof with gables or make a flat roof.

Canadian Logs are stained and waxed for durable good looks. Decorative signs add more color and life. This set builds the models shown and more. Combine these pieces with other Canadian Logs sets for larger layouts.

Colours of toy may vary from illustration.
