Différentes pièces : 36

Couleurs : acier nickelé
 & roues rouges.

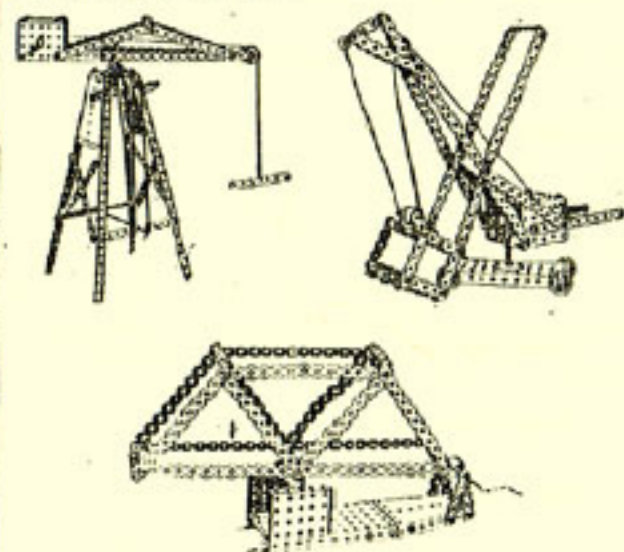

Moteurs : aucun

ENGINEERO

The Dandy Builder

Engineero Sets represent just what the name implies, a toy and model builder with engineering principles in miniature. It is both fascinating and instructive with which all illustrated models can be constructed, and many others of your own invention. Below we illustrate a few of the 300 models that can be made with the larger sets.

ENGINEERO CO.

369 BROADWAY
