

Nom : PROTO
Période : 1960 – 1998

Pays : Angleterre

Type : Système non mecanoïde.

Construction mécanique du genre de F.A.C.

Fabriqué par : Model & Prototype Systems Ltd. (Surrey)

Diamètre des axes : 6 mm

Diamètre des trous : 6 & 3,5 mm

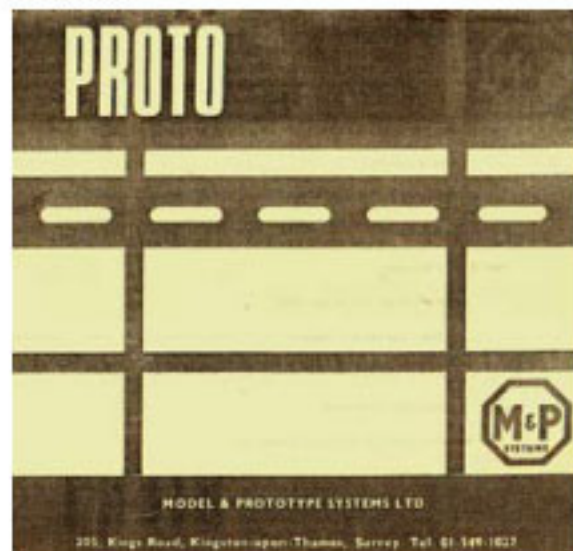

Espacement des trous : 14 mm & variable

Boîtes disponibles : PCU1, PCU2, PCU3

Différentes pièces : 103

Couleurs : noir & acier brillant

Moteurs : moteur électrique
+ boîte de réduction

PROTO

The PROTO system of modular parts for small structures and mechanisms is based on 6mm shaft, 4mm structural rods, M3 screws and 0.7 module gears. It is available in the following units, each in a well finished varnished wood carrying case.

PROTO Major Construction Unit (PCU 1)

The full range of components for making structures and mechanisms including a selection of spur gears plus a geared electric motor and 4 speed gear box.

PROTO Standard Construction Unit (PCU 2)

Substantial quantities of components for making structures and mechanisms including gears, racks, chains sprockets, slotted angle, shafts and bearings.

PROTO Basic Construction Unit (PCU 3)

A selection of the more widely used components for making structures and mechanisms. Supplementary parts may be added subsequently to bring the Basic up to Standard or Major specification.

The elements from all the units are fully interchangeable. Parts may be bought separately in small lots and are available from stock.
